

## Minutes for February 1, 2007

### Pre-Presentation:

Steve Callis with OA discussed the Missouri Business Portal. They are finalizing launch of the site and are identifying contacts at each agency to let them know when they are ready to go live.

<http://business.mo.gov>

If you know of any other business-related links that need to be added, please contact

[steve.callis@oa.mo.gov](mailto:steve.callis@oa.mo.gov)

### Presentation:

Nancy Gordon with Office of State Courts Administrator presented examples of eLearning systems they had built with both Adobe Authorware and Captivate. She showed a court security training with integrated video, a system using Captivate to show its demo capability as well as their downloadable library of help files. Voiceover narration can be included with your online tutorials/trainings as well as having them complete quizzes, etc. If you have questions, email [nancy.gordon@courts.mo.gov](mailto:nancy.gordon@courts.mo.gov).

Nancy provided a handout which is located here:

[http://store1.adobe.com/devnet/captivate/articles/scenario\\_learning\\_02.html](http://store1.adobe.com/devnet/captivate/articles/scenario_learning_02.html)

Captivate product features:

<http://www.adobe.com/products/captivate/productinfo/features/>

Authorware product features:

<http://www.adobe.com/products/authorware/productinfo/features/>

We will let DMD know whether their developer will be able to do a how-to demonstration of the tools next month.

### Old Business:

#### ITAB Report

Work on the next generation network is taking longer than expected.

They are working on a state flyover GIS project and are trying to get more funding to buy higher-resolution equipment for improved details

Chris Wilkerson is working on the reclassification project and that is taking longer than expected.

#### Web Standards Group

Online Services XML schema –

We are moving forward with the online services project. Copies of the online services categories were passed out to attendees. If this needs to be expanded, let the subcommittee know. The online services project will be developed much like the RSS News feed. Larry Murphy will be working on building a Web interface for the online services Webpage. Rodney Distler will be working on the aggregator piece as well as the documentation on how to populate the online services schema.

We are still targeting April to get this up and fully functional in time for the Brown Study review. The how-to documentation should be together and available very soon. Debbie Boeckman mentioned capability of exporting from Access or Excel to XML that DNR is testing and they will let us know how that goes.

Google Search Engine Contract –

Working on a justification document to continue with the product once the contract is up this Summer. No one mentioned any competitor that we should consider.

Lynn McKee mentioned a free IBM/Yahoo search engine that could be used on an Intranet - Therese Fick with OA is looking into it. (It does however have a \$1900 maintenance fee which makes it comparable to the Google mini)

### **Mailman Listserv – Debbie Boeckman**

DNR tested the use of the mailman topic feature where you can subscribe to different topics for one listserv. They broke it down by MO counties. It's working great so far and they can see many different uses for this feature.

## **New Business:**

## **Agency Projects/ Open Discussion:**

DNR – will be launching its GIS Map Viewer on its public Website. Currently it had only been an intranet tool.

Pat W. asked whether anyone had launched IE7 yet. No one at the meeting had moved to it yet.

Ron mentioned the Job Performance application is currently under development for use by the consolidated agencies. The deadline for completion is April 07. This will be used to evaluate ITSD employee job performance.

Next monthly meeting is March 1 from 1:30 pm to 3:00 pm in room 500 of the Harry S Truman Building. ***The tentative plan is to have a part 2 portion to the February presentation on eLearning (Authorware and Captivate).***
